WORK EXPERIENCE

Packative (패커티브)

Apr. 2023 – Present

Full-stack Developer

Seoul, South Korea

- Lead the backend development of a new ERP product from the ground up
 - Made architectural and stack decisions for scalability, keeping in mind the progression of the product to a SAAS platform (NestJS, PostgreSQL, Kafka).
 - Handled backend development, DevOps, actively participated in sprint planning, maintained documentation, and implemented front-end features (React).
 - Resulted in a 50% increase in sales team productivity, which in turn increased revenue for the company.
- Implemented a data solution to create marketing dashboards
 - Used tools like Airbyte and Funnel to gather, regroup, sort, and analyze data from multiple sources into Google BigQuery.
 - Used Looker Studio to implement dashboards for ease of use by the marketing team.
 - Enhanced the marketing team's understanding of NaverAds and GoogleAds campaigns, resulting in improved marketing strategies based on real data evidence.

YoYoHub (요요허브)

Nov. 2022 – Apr. 2023

Lead Full-stack Developer

Seoul, South Korea

- Created a stock investment platform from scratch using React (Next.js), NodeJS, Python, MariaDB & TypeORM, handling the hosting through AWS.
- Increased developer productivity by implementing AGILE methodology.

Contentsquare

Jul. 2021 – Jul. 2022

Full-stack Developer

Paris, France

- Improved a dynamic web replay system of user sessions.
- Migrated components from a monolithic architecture to a dedicated front-end microservices architecture.
- Wrote documentation to help new team members get started and develop efficiently on the dynamic web replay system.

Agilap

Jul. 2020 – Jul. 2021

Full-stack Developer

Paris, France

- Created banking/real estate web components.
- Maintained and evolved the functionalities of a real estate web platform.

EDUCATION

EPITECH

Graduation August, 2017
